RaiBlocks Rebrands To 'Nano' -- XRB Price Has Surged 41% In 24 Hours, With 20% Bull Run This Morning

Jesse Damiani, CONTRIBUTOR

I cover the human side of VR/AR, Blockchain, AI, Startups, & Media. [FULL BIO](#) ✓

Opinions expressed by Forbes Contributors are their own.

Nano

New Nano name and logo

New year, new rules.

It's been a wild couple months for cryptocurrencies worldwide, with major swings of volatility. RaiBlocks is no exception, having rocketed up from less than \$0.25 on Dec. 1 to nearly \$35 earlier this month. But amid all that movement and growing name-recognition, one team has decided to rebrand.

According to a [blog post](#) out today, RaiBlocks is officially becoming 'Nano.' The decision came after the team gathered together to discuss their vision of the future:

“ In November, the team gathered to discuss the future of Raiblocks and develop plans to further the project’s growth. One topic discussed was the name itself (“Is it, ray or rye?,” “Ditch the Blocks!,” “Just call it Rai!”). Feedback from the community suggested that improvements could be made to better resonate with the public and a mainstream audience. Because of this, our team made the decision to rebrand.

[Ed note: Investing in cryptocurrencies or tokens is highly speculative and the market is largely unregulated. Anyone considering it should be prepared to lose their entire investment.]

The company went on to explain the rationale behind the new name and logo:

“ The Core Team wanted a name that represented the simplicity and speed of the project, and Nano does just that. The new logo uses several nodes, playing on the block-lattice design of the network, that connect to form an “N.” All social media accounts will be updated to reflect the name and logo changes. The new website is nano.org.

All XRB funds, wallets, and transactions will continue to operate as they have.

XRB Price Surge

XRB was trading for \$14.02 10:24am PST Jan. 30, according to [CoinMarketCap](#). At the same time the next day, that number was \$19.81, marking growth of 41 percent.

XRB price movement

Whether or not the name change will have the desired outcome, only time will tell. Since the original post went up around 7:00am PST Jan. 31, The XRB price has grown from 16.41 to \$19.81, or over 20 percent.

Other factors could be influencing this growth, including new exchange listings and an increased interest in Directed Acyclic Graph (DAG)-based cryptocurrencies.

"[Nano] has been gathering momentum over time as people become more aware of the advantages of DAG-based cryptocurrencies, and as more exchanges list their coin," Blockchain Consultant Chadwick Strange said. "KuCoin ran into some issues managing the high volume demand when they listed XRB—which was resolved with time—the lessons learned from KuCoin listing should help prepare for a smooth listing in Binance, which is expected very soon."

What happens to my XRB after Nano rebranding?

Since Raiblocks (XRB) have officially announced about the rebranding to Nanocurrency with new website nano.org—there are lot of questions running in everyone's mind. Answers for few of them are here.

Are my XRB automatically converted to Nano?

Yes! You don't have to do anything. If you had 10 RaiBlocks (sometimes referred to as 10 mrai), you now have 10 Nano. You can hodl them, send them, request them or trade them same as always.

Some exchanges may be in the process up upgrading to show XRB is now Nano. You can either use caution and wait until their upgrade is

EXHIBIT B

finished or go ahead.

Do the denominations change

№10 XRB (or 10 mrai) is 10 Nano. The only thing that changes is the ticker (remember to use \$NANO on Twitter)

Is my wallet address the same?

Yes! Your wallet address will continue to be xrb_... for the short term. You can still transact just as you did before.

What if my funds are on RaiWallet

RaiWallet is rebranding to <https://nanowallet.io/> but still has the same backend and the same code. The only things that are different are the website name, design and URL. It is still our official web wallet.

What if my funds are on the old Desktop Wallet

Your funds are still safe on there. We are also rolling out new desktop and mobile wallets soon. As long as you have your Wallet Seed backed up, you can use those funds on any of our new wallets. We encourage you to update to one of our new wallets so you can use the latest and greatest in Nano tech.

What will happen to @Raiwalletbot?

Now you must use @NanoWalletBot to manage your funds. Open and find your accounts of the old raiwalletbot, with everything intact, except that it has a new logo and name.

This article is replicated from information posted on [Reddit](#) to reach more audience as most of crypto-investors are on Medium. Original post is [here](#)

Once your questions are all answered and wondering how to buy Nano (previously called as Raiblocks). Head out to following articles depending on exchange you want to buy.

🕒 2 min read / January 31, 2018

By **Paddy Baker**

The digital asset RaiBlocks (XRB) has confirmed on Wednesday that it will be rebranded as Nano.

On a blog-post posted today, the XRB team said that the decision to change the name would represent “the simplicity and speed of the project”. The new logo uses nodes connected together to form the letter ‘N’.

Raiblocks admitted the original name had had a mixed reception from consumers, with confusion on how it was supposed to be pronounced. They decided to find a name that would “better resonate” with the public and mainstream audience.

XRB has specialised in ensuring that very small transactions or 'micropayments' happen quickly. Unlike other cryptos, XRB cannot be mined and there is no hard cap, tokens issued centrally. The original name was a playful reference to the giant, unwieldy Rai that were used as currency on various Micronesian islands until the beginning of the 21st century.

The new name and logo design will be updated onto the digital asset's social media accounts and the website name will be changed to 'nano.org'; addresses will continue to start with 'xrb' for the time being. All XRB funds, wallets and transaction will continue to operate as usual.

The RaiBlocks, now Nano team, said that they had met up in November to discuss the future of the company and had decided to rebrand at the meeting.

Although the price of XRB has been trending upwards since the beginning of the year, it has been the best month for XRB, which has been trading at half of the peak values of around \$100.

Capita:
Shock
Profit
Warning
Wipes

£1bn of Company Value

🕒 2 min read / January 31, 2018

By **Paddy Baker**

£1bn was wiped off the value of public services provider, Capita, after the company is shock profit warning on Wednesday.

City analysts had predicted profits of £400m for Capita in 2018, but the group warned expected profits to be between £270m-300m.

Capita is now expected to take evasive actions, including axing dividend payments as means to raise £700m so as to put finances back on track. The company has debts of £1.1bn and a pension deficit of £380m.

At the news, share prices in Capita crashed 45% to £1.90, its lowest price since January 2003.

Political and Economic Challenges in Going It Alone

⌚ 4 min read / January 31, 2018

By **John Theodore**

In the past, British foreign policy has always been directed to support its global export trading initiatives. The nation's prosperity relies on this. But leaving the EU – even with a 'comprehensive' trade agreement – will not be enough. Observers at the Davos Economic Summit already note that Britain's standing in the world has taken a knock.

In political terms, its planned exit from the EU removes it from the world's most influential. Even while negotiating this exit with a two year transition period, it has to accept EU law and any new EU rules without the power of influence or veto. These conditions have been imposed directly by the EU27 in their instructions to the Brussels negotiators.

Going it Alone

The perception of weakness in Brussels, as in other European capitals, is encouraging the inability of Theresa May's minority administration to agree on the terms of a transition agreement. In addition, her cabinet ministers seem incapable of forming a consensus on the kind of final trade deal they wish to negotiate with the EU27.

Currently, her government is defending unofficial leaks from Dexeu (The Department for Exiting the European Union), which is responsible for overseeing negotiations for the UK's withdrawal from the EU. These leaks have caused substantial embarrassment for Brexiteers, as they demonstrate that no economic scenario exists for Britain being better off economically than the EU.

In going it alone, Britain's foreign policy establishment must now prepare for new challenges. This means taking a hard line on trade negotiations and on the EU's demands for a level playing field.

Raiblocks Cryptocurrency Rebrands as Nano as Coin's Price Soars

Bye blockchain, hello block lattice.

By [Alasdair Wilkins](#) on January 31, 2018
Filed Under [Bitcoin](#), [Blockchain](#) & [Power](#)

It's been a rough day and a rougher week for [cryptocurrency](#), but one coin is taking a drastic step to change its fortunes. The team behind the cryptocurrency Raiblocks announced Wednesday that the coin is officially rebranding itself as Nano, and the early returns for the coin are promising.

The cryptocurrency is the 20th largest in the world according to CoinMarketCap, with a \$2.6 billion market cap. The coin's price is up to about \$20, up from a recent low of \$13 on January 29. That isn't the coin's all-time high, as it reached as high as \$33 in early January amid the general cryptocurrency boom, but it's one of relatively few coins that has shown signs of recovery amid the general downturn.

The big idea behind what is now Nano is [the block lattice](#), a variation on the [blockchain](#) technology that underpins cryptocurrencies like [bitcoin](#). The tech is a direct reaction to a central problem with bitcoin, which is that its ever-expanding digital ledger makes transaction times painfully slow and consumes infamously large amounts of power. Nano gives each account key its own distinct blockchain that then replicates to other peers on the network. This speeds up processing times and reduces energy needs.

This smaller-scale, networked approach is part of the reason the team says they made the shift to the new name — along with the fact nobody could quite agree how to pronounce “Raiblocks.”

“The Core Team wanted a name that represented the simplicity and speed of the project, and Nano does just that,” the team writes in a Medium post [announcing the move]. The new logo uses several nodes, playing on the block-lattice [design](#) of the network, that connect to form an ‘N.’”

The team assured users that the switchover would be seamless, with all funds, wallets, and transactions expected to continue operating normally. The team also promised the introduction of a desktop and iOS mobile wallet later in 2018. The coin has also been added to new exchanges like Kucoin and Bit-Z, fueling general optimism for the relaunched cryptocurrency.

RaiBlocks Rebrands To Nano: Excellent Mid-Week Price Development

By Alex Tomzack

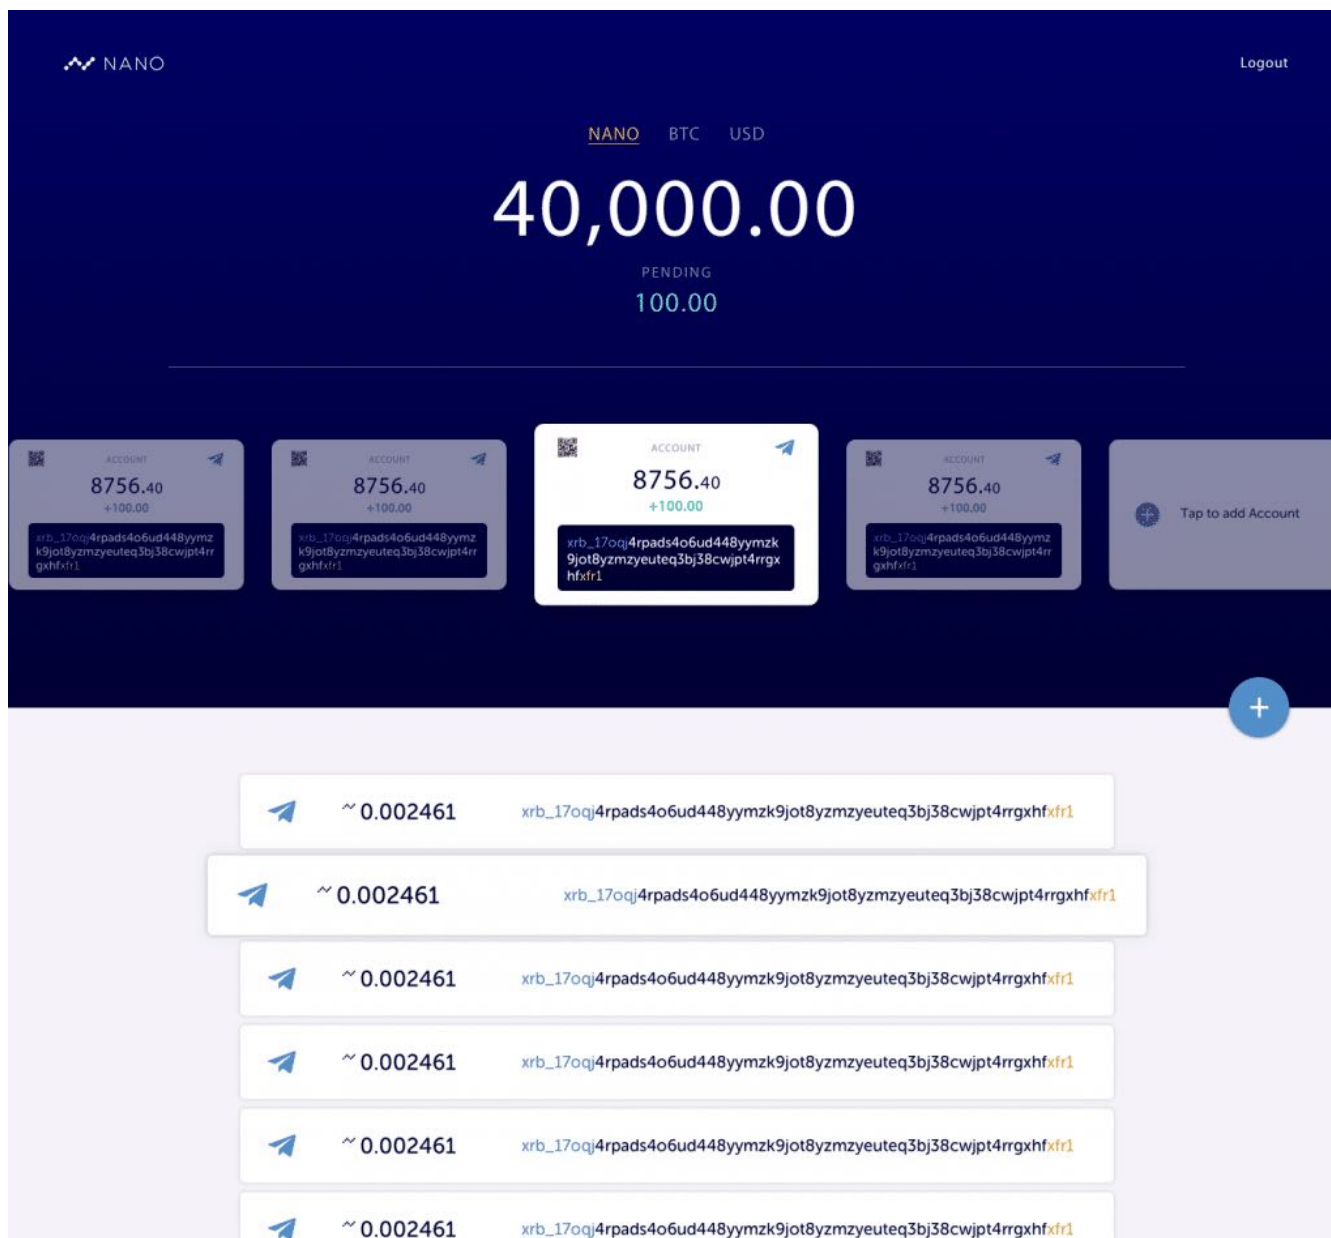

Last updated Jan 31, 2018

ALTCOIN NEWS

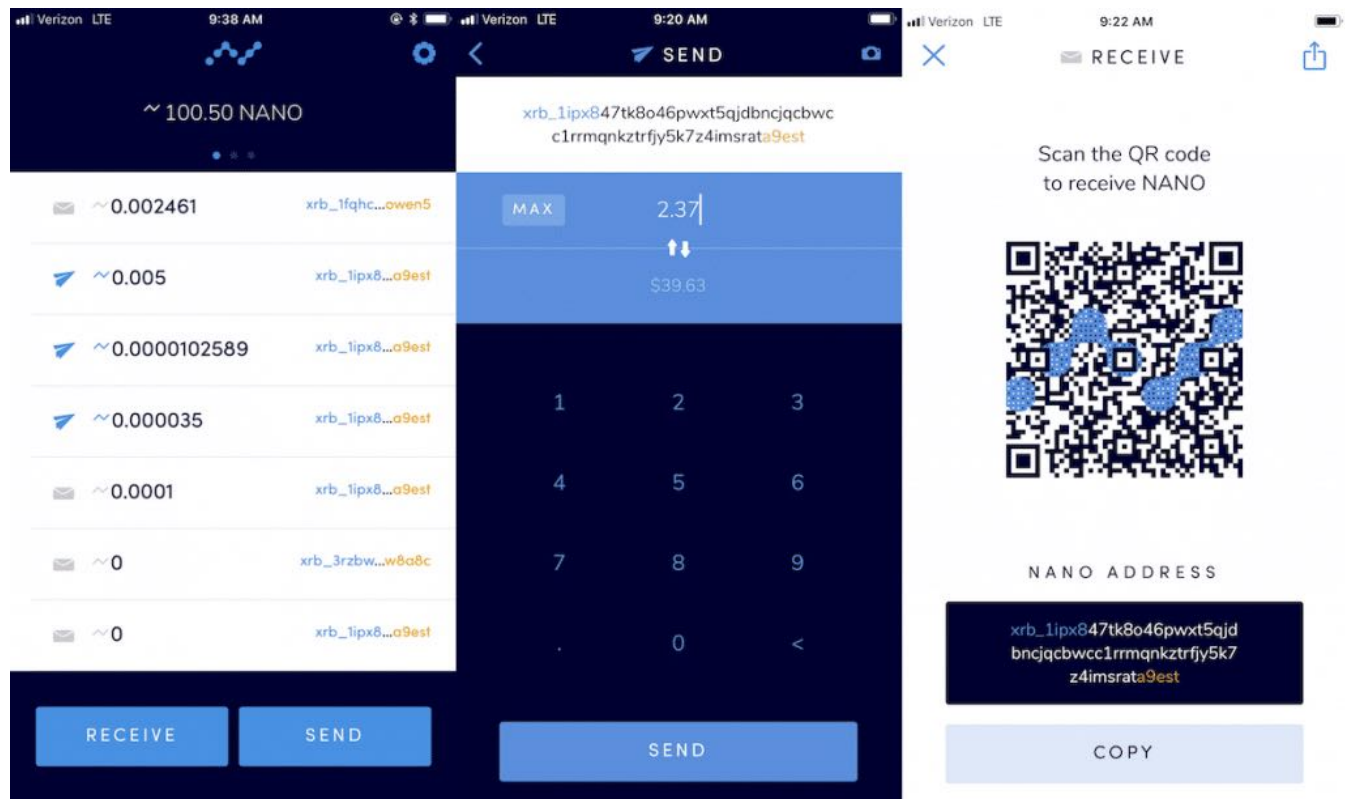

A fascinating year for its enthusiasts was just left behind by RaiBlocks, with an unprecedented growth finale in December to sum it up. As mentioned in a press writing, the team behind RaiBlocks did gather around the table in November to discuss the future and what is coming next for the project.

Since then, it has been on plan for a rebrand to take place as the feedback by the community did support the idea for a name change so it better resonates with the public and mainstream audience. So **Nano** has been announced.

The Core Team wanted a name that represented the simplicity and speed of the project, and Nano does just that. The new logo uses several nodes, playing on the block-lattice design of the network, that connect to form an “N.” All social media accounts will be updated to reflect the name and logo changes. The new website is nano.org.

On the other hand transactions, wallets and all funds will still function on the way they were before. xrb_ will continue to be on the start of addresses temporarily as the team will be introducing nano_ addresses.

”

“The launch of Nano is just the beginning of what will be an exciting 2018! Beta testing sign-ups are open for both the desktop wallet and iOS mobile wallet.”

Nano [XRB] is close to testing the major \$20.00 resistance which end Dec and beginning of January did act as an important support. For the moment it is changing hands at \$19.60 with 37.81 percent gain in the last 24-hours. Clearing the hurdle could open doors for more surge during the day.

RAIBLOCKS REBRANDS TO NANO | XRB PRICE SURGES IN JUST 24 HOURS

JANUARY 31, 2018 KMLEVO | HOURS, NANO, PRICE, RAIBLOCKS, REBRANDS, SURGES, XRB

In the latest crypto news, RaiBlocks rebrands to Nano.

The instant transactions, zero fees, infinitely scalable altcoin RaiBlocks (XRB) announced today that it would be rebranding itself. Nano will be its new identity. That means no more uncertainty over the pronunciation of the name – Ray? Rye? – because now the name is sleek and simple. The question now becomes, what does a rebrand mean for Nano?

So far, it's purely good news. Currently, XRB is selling for \$19.81. The coin has gone up 37.77% in the last 24 hours, making it the biggest crypto changer for the day. However, it's not quite clear whether this increase is due to the rebranding or if it's just part of the ebb and flow of crypto. XRB has, after all, done better in the past, selling for \$36.00 at the beginning of January.

>> Coincheck exchange will repay hack victims

Source: CoinMarketCap

Nano is ranked as the 22nd highest cryptocurrency by market cap.

RaiBlocks rebrand has been highly anticipated and much discussed by those in the crypto community. People can't seem to decide if the rebranding is a good idea or not. On the one hand, Nano is, relatively speaking, a more workable name to market and pump people up about. On the other hand, transitions like this always run the risk of confusion, not everyone gets the memo that the rebrand has taken place.

>> Facebook bans Bitcoin ads

On top of that, there is the wallet Ledger Nano S. The wallet and the token have nothing to do with each other, but now that RaiBlocks is going to be going by Nano, some people might think they do.

The team obviously thinks this is the right move for the token. According to them, all processes will remain the same and for the time being, addresses will continue being listed as xrb_. nano_addresses will come later down the road. The team is open to any and all questions the community may have about the rebranding process and transition.

The team wanted a name to reflect what the crypto represents: simplicity and speed. For them, Nano is the answer.

Is Nano the answer for you?

Raiblocks (XRB) confirma Rebranding para “Nano”

Studio Bitcoin • 31/01/2018 • 1

LET'S START BUILDING
A PORTFOLIO TOGETHER.

A criptomoeda [RaiBlocks](#) (XRB) confirmou nesta quarta-feira que estaria dando um Rebranding para **Nano**.

Através de uma [publicação](#) no blog, a equipe da XRB disse que a decisão de mudar o nome para Nano representaria “a simplicidade e a velocidade do projeto”. O novo logotipo tem um formato de um “N”, com um design muito melhor que o antigo.

Raiblocks admitiu que o nome original tinha uma recepção mista dos consumidores, com alguma confusão sobre como deveria ser pronunciado. Eles decidiram encontrar um nome que “melhorasse” para o público.

A XRB se especializou em garantir que as transações muito pequenas ou “micro pagamentos” aconteçam rapidamente.

O novo design de nome e logotipo serão atualizados nas contas de mídias sociais do ativo digital e o nome do site será alterado para “nano.org”; Os endereços continuarão começando com “XRB” por enquanto. Todos os fundos XRB, carteiras e transações continuarão a funcionar como de costume.

O RaiBlocks, agora time da Nano, disseram que se conheceram em novembro para discutir o futuro da empresa e decidiram dar um Rebranding na reunião.

Embora a postagem do blog fala sobre “crescimento sem precedentes” em dezembro, janeiro não foi o melhor mês para a **XRB**, que vinha sendo negociado na metade dos valores máximos, em torno de US\$ 16,85. Atualmente seu preço é de US\$ 19,07, é conta com uma capitalização de mercado de aproximadamente US\$ 2.5 bilhões de dólares. A criptomoeda se posiciona em 22º no ranking do coinmarketcap.

O que é Rebranding?

Rebranding é uma estratégia de marketing, no qual uma organização decide alterar a sua denominação, ou o seu logotipo, ou o seu design, ou outros elementos identificativos, para formar uma nova identidade.

Hey George - See note below from our head of listings. I think there might have been some miscommunication here. As I mentioned, we've never charged a listing fee of any kind. Have you officially submitted an application through our [asset hub](#)?

----- Forwarded message -----
From: **Zach Segal** <zach.segal@coinbase.com>
Date: Tue, Sep 7, 2021 at 12:31 PM
Subject: Re: Coinbase X Nano
To: Elliott Suthers <elliott.suthers@coinbase.com>

Hi Elliot,

Yes, they're conflating what was an account deposit minimum with a fee:

*"we generally have minimums of about \$1M **in the account** for assets that are currently supported on the platform."*

Exchange listing has never had a fee. This email was about *custody* integration, and the \$1M refers to a general minimum to open an account. It is not a fee -- it's a balance that remains in control of the account holder. Custody does charge a nominal fee on assets held in the account, but saying that \$1M is inaccurate.

Hope that helps!

On Tue, Sep 7, 2021 at 11:59 AM Elliott Suthers <elliott.suthers@coinbase.com> wrote:

Hey Zach - I'm on a panel later this week with George and she seems to think that we refused to list Nano unless they paid a \$1M listing fee. Is that accurate or is she misinterpreting/conflating with our minimums for custody?

We're reviewing your application

Thanks so much for your patience. We have started the first stage of our review process, which involves running your application through a rigorous evaluation framework. This process can take several weeks — we'll reach out via email with next steps.

We want to ensure that every asset on the Coinbase platform meets our [eligibility requirements](#) for our legal, compliance, and technical security reviews, as well as our integration/business/market requirements.

We're excited to continue on this journey together and look forward to the next steps in building the crypto economy.

Coinbase Earn Introduction - NANO

5 messages

'Allie Heinrichs' via Finance accounts <accounting@nano.org>

Tue, Mar 8, 2022 at 6:43 PM

Reply-To: Allie Heinrichs <allie.heinrichs@coinbase.com>

To: accounting@nano.org

Cc: Brenna Barker <brenna.barker@coinbase.com>

Hi Nano team,

I hope this email finds you well! My name is Allie and I'm a relationship manager on the Listings Team here at Coinbase.

Reaching out because I wanted to make sure that you had an open line of communication with Coinbase's Earn team. If you haven't yet evaluated an Earn campaign, I'd highly recommend chatting with Brenna from our team (cc'd). I've included more information on Earn below, and Brenna is happy to set up an intro chat to answer any additional questions you may have.

What is Earn?

Earn gives you the opportunity to target the 76M+ unique users we have on the platform. We work alongside you to promote massive distribution while giving Coinbase users a baseline education of your project. See coinbase.com/earn for examples of past campaigns.

Case study:

[*How MakerDAO doubled it's users in a single weekend using Coinbase Earn*](#)

If this is something that might be of interest, please don't hesitate to reach out to **Brenna**.

Should you have any questions outside of Earn, I am here as a direct line of contact.

Thanks!

Allie - Coinbase Listings Team

Thanks Allie!

Hi Nano Team - It is great to e-meet you! I'd love to find a time to introduce myself and see how we can best support you on the marketing side with Coinbase Earn during a listing.

Do you have availability Friday or next week to connect? I am in the eastern time zone.

Hi Brenna and Allie,

Thank you so much for your emails - wonderful to hear from you. Apologies for the delay in response, I have been battling Covid having avoided it for the last 2years!

Can I take it that nano is being listed on Coinbase from your communication? Brilliant news!

We have availability on this Friday (25th) at midday which would be 9am for you? Otherwise please feel free to suggest a time next week (I am based in London).

Best,
George

Hi George,

I'm sorry to hear that you've been battling covid. I'm hoping that you are on the mend!

This introduction does not guarantee that you are getting listed on Coinbase, but you are in the review process. We are out of the office next week. My schedule is looking fairly open April 4. What does your availability look like for a call around Coinbase Earn then?

Hi George,

How are you doing? I hope you are feeling fully recovered from covid and feeling much better! I wanted to check back in and find a time for us to connect and discuss Coinbase Earn in more detail and how it can enhance your potential listing. Please let me know when is a good time to connect. I look forward to hearing from you!

REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION

WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.

Requirements in the First Ten Years*

What and When to File:

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.* See 15 U.S.C. §1059.

Requirements in Successive Ten-Year Periods*

What and When to File:

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.*

Grace Period Filings*

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

***ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.

NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.

EXHIBIT R

TRADEMARK ASSIGNMENT AGREEMENT

WHEREAS, Colin LeMahieu, having an address as 3319 W. Braker Lane, Suite 300, Austin, TX 78758 (hereinafter referred to as ASSIGNOR), is the owner of the following trademarks (hereinafter, "Trademarks"), together with the goodwill of the business symbolized thereby in connection with the goods and services on which the Trademarks are used:

Ref. #	Mark
U.S. Trademark App. Ser. No. 87760251	NANO FOUNDATION

Coinbase Derivatives Exchange to make nano bitcoin futures available through leading brokers

Tl:dr:

- *Coinbase Derivatives Exchange (formerly FairX) will launch its first listed crypto derivatives product on June 27, 2022: Nano Bitcoin futures contract (BIT), with each contract sized at 1/100th of a bitcoin.*
- *Upon the June 27th launch, BIT futures will be accessible for trading via several leading third-party retail brokers and clearing firms.*
- *Coinbase Financial Markets is awaiting approval for its license to operate a futures commission merchant (“FCM”) to be able to offer futures directly to our clients.*

By Boris Ilyevsky, Head of Coinbase Derivatives Exchange

Coinbase Derivatives Exchange, a CFTC regulated Designated Contract Markets (DCM) futures exchange, will launch its first listed crypto derivatives product on June 27: Nano Bitcoin futures (BIT). Initially, BIT futures will be available for trading via several leading broker intermediaries, including *retail brokers* EdgeClear, Ironbeam, NinjaTrader, Optimus Futures, Stage 5, and Tradovate, and *clearing firms* ABN AMRO, ADMIS, Advantage Futures, Dorman Trading, ED&F Man, Ironbeam and Wedbush. Coinbase is awaiting regulatory approval on its own futures commission merchant (FCM) license so we can offer margined futures contracts directly to our clients.

Transforming FairX into Coinbase Derivatives Exchange married a world-class team with deep expertise across product development, market structure, compliance, market-leading exchange technology and a proven ability to deliver listed futures, with Coinbase's commitment of building products that are easy-to-understand, fair, accessible, efficient, and transparent.

Around-the-clock trading, lower upfront investment, leverage and the ease of going long and short are some reasons why futures are a popular product for traders. Our BIT

in US regulated crypto futures markets.

The crypto derivatives market represents \$3Tn* in volume worldwide and we believe that additional product development and accessibility will unlock significant growth. It's more important than ever to bring the benefits of futures to a broader market so that all types of traders can access regulated U.S. crypto derivatives markets to express their views or hedge their underlying crypto assets.

To become one of our supporting brokers, market makers, clearing firms, or vendors, please email futures.sales@coinbase.com.

Coinbase Derivatives Exchange to add Nano Ether Futures Contract

Tl:dr:

- *Coinbase Derivatives Exchange will launch its second listed crypto derivatives product on August 29th, 2022: Nano Ether futures contract (ET).*
- *ET futures will be accessible for trading via several leading third-party retail brokers and clearing firms upon its launch.*
- *Since launching on June 27th, the Nano Bitcoin futures contract (BIT) has traded a total of 2.9MM contracts as of August 24th.*

By Boris Ilyevsky, Head of Coinbase Derivatives Exchange

Coinbase Derivatives Exchange will be launching a Nano Ether futures contract (ET) on August 29th as we continue to build an accessible futures market for the retail trader.

Sized at 1/10th of an ether, the contract unlocks another opportunity to trade the price of a popular digital asset with less upfront capital than traditional futures products. This will enable all types of traders to securely access regulated U.S. crypto derivatives markets to express their views or hedge their underlying crypto assets.

This launch follows the introduction of our Nano Bitcoin futures contract, which was made available on June 27th to the participants of six retail brokers through our CFTC-regulated Designated Contract Market (DCM). In the last 30 days, that contract has traded an average of 77,000 contracts per day.

While still in its early stages, we believe that product innovation and an accessible entry point for the retail market have contributed to its success. At 1/100th of Bitcoin, our Nano Bitcoin futures contract requires less upfront capital, allowing participants to easily go long or short the price of Bitcoin and manage risk in volatile markets.

Coinbase's 'Nano' Bitcoin Futures Product Surges amid Declining Trading Volume

Aaron Limbu Jul 25, 2022 05:20
1 Min Read

Coinbase's new derivatives unit is capturing the interest of new retail traders who are eyeing the crypto exchange's "nano" bitcoin product amid the company's collapsing trading volumes.

NEWSLETTER SIGN UP

Subscribe now and get exclusive news, interviews and stories.

Enter your email address

✉ Subscribe

LATEST

Coinbase's "nano" bitcoin futures product saw volumes touch records three straight days in the last week even after its spot trading volume collapsed from \$200 billion in May 2021 to \$59 billion in July.

The nano bitcoin futures product was launched in June.

According to The Block, the cash-settled futures contract represents 1/100th of a bitcoin and trades across several retail brokers, including Wedbush, EdgeClear, and NinjaTrader.

"It requires less upfront capital than traditional futures products and creates a real opportunity for significant expansion of retail participation in the US regulated crypto futures markets," Boris Ilyesky, head of Coinbase Derivatives Exchange, said at the time of the product's launch.

Following several days of increase, the nano futures' national volume eventually touched 217,045 on July 19. However, data from Bloomberg shows that contract volumes fell to 117,493 on July 22.

In June and July, data showed that volumes stood [below](#) 50,000 contracts traded daily.

The crypto exchange firm saw a "surge in activity ever since retail broker partners started marketing/ promotional efforts last week," according to an email sent out by Coinbase's sales team.

Coinbase only entered the derivatives market this year after it purchased FairX - a derivatives venue regulated by the Commodity Futures Trading Commission.

Its competitors are firms like [FTX](#) and CME Group, which trade tens of billions of dollars per month in bitcoin futures.

MONETARY & FINANCIAL FREEDOM

With blockchain, we will put an end to the monopoly of government-issued currencies, as suggested in the title of Hayek's work – "Denationalization of Money." Blockchain will simplify the set of concepts revolving around financial services and the complexity of the IT systems. With blockchain, we will have a cryptocurrency that is more stable and safer than any currency that has ever existed before it. This will bring about true "monetary and financial freedom."
